EDUdata: an AI assistant for open Dutch education data

CEDA · Centre of Educational Data Analytics

Npuls · 2026

WHO IS CEDA

Centre of Educational Data Analytics

One team within Npuls. From raw data to AI application, open source.

- Data, analytics and generative AI in one chain
- Always co-created with mbo, hbo and wo institutions
- Open source, for every institution

Npuls

THE PROBLEM

The data is open. Finding it is not.

CBS
StatLine

DUO
Education

RIO
Register

Three sources. Three structures. Three vocabularies.

A REAL QUESTION

"How is first-year intake in our programmes developing compared with similar institutions?"

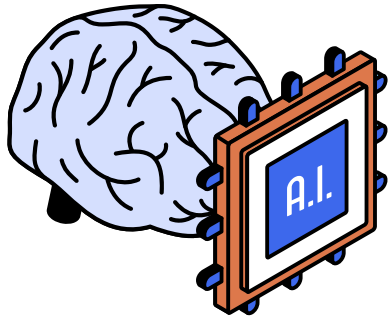

Today: a specialist, several sources, days of work.

THE ANSWER

EDUdata

An AI assistant for open Dutch education data, for mbo, hbo and wo.

- You **ask** in plain language
- It **finds** and retrieves the data
- It **shows** a dashboard

STEP 1 · ASK

In your own words

You

Compare first-year enrolment in business programmes at universities of applied sciences over the last five years.

No query language. No dataset knowledge.

STEP 2 · FIND

It picks the source and retrieves the figures

Understand
the question

→

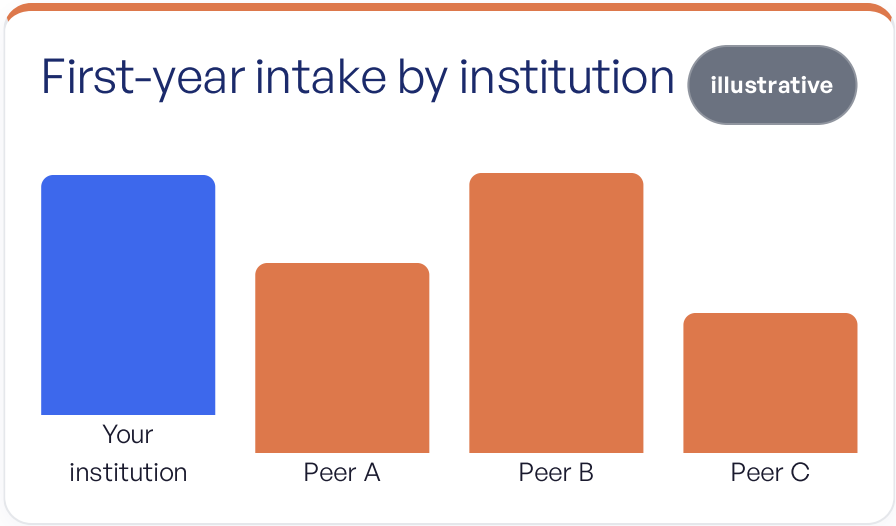

Select
the right source

→

Retrieve
the figures

STEP 3 · SHOW

A dashboard you can share

THE GAIN

From request queue to self-service

Faster answers, less dependence on a few experts.

PART 2

Can we trust an AI with figures?

DESIGN PRINCIPLE

The AI talks. Code counts.

Language model

Understands and explains

Chooses the tool. Words the answer.

Deterministic code

Looks up and calculates

Catalogue, codes, calculations.

TRACEABILITY

Every figure points to its source

✓ Open sources only | ✓ Source shown | ✓ Known limits stated

E.g. preliminary CBS figures can be revised.

DELIBERATE SCOPE

It says no instead of guessing

In scope

mbo · hbo · wo

Closed

po · so · vo

One gated exception: vo-context for higher-education questions.

QUALITY

Tested, evaluated, reviewed

Automated tests

On every change.

Evaluation set

Critical questions with expected answers.

Controlled release

Test first, then promote.

PART 3

Where we stand

Demo phase

HONEST STATUS

What works, and what does not yet

Works

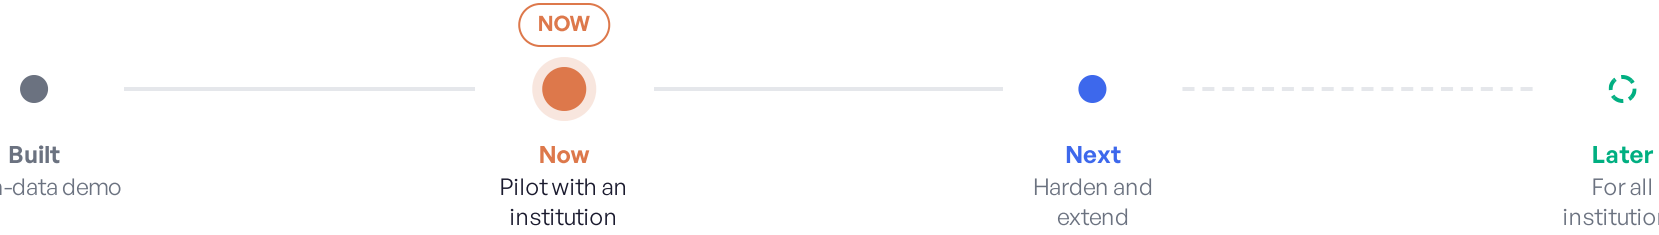

- Questions across CBS, DUO, RIO
- Dashboards with sources
- Controlled releases

Not yet

- No institutional login
- No live vacancy data (snapshot May 2023)
- No own institution data

NEXT STEPS

From demo to something you can use

WHAT WE ASK

Run a pilot with us

CEDA · Npuls × your institution, using your own data.

We bring

- The assistant, open source
- Engineers and data experts

You bring

- A sponsor and a use case
- Your own institution data

First use case: **student acquisition, benchmarked against peers**.

WHO BENEFITS

Better decisions, sooner

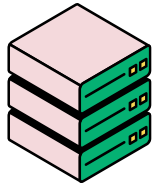

Directors

Grounded, traceable answers.

Policy workers

Self-service exploration.

Analysts

Time for the hard questions.

Npuls

IN CLOSING

Stay in touch

Questions, feedback, or keen to build with us? We would love to hear from you.
